

K-LOVE is a wonderful station. I have them programmed in my car radio for listening on my long commute (one hour each way) to and from work each day. They provide up to date information on world news. They also provide wholesome broadcasting that my 13yr old can listen to with me without hearing fowl language, jokes or music that I do not believe is appropriate for my 13yr old.

It would be a terrible tragedy to allow the FM station K-LOVE (94.3) to be replaced or put behind the LPFM station, who may or may not provide the quality and type of programming I have grown to love and enjoy through 94.3 K-LOVE.

This music is quite beneficial and would have a tremendous positive effect on my community if allow to remain at its current station and frequency.

Please do not remove the FM station from our radio waves in the 94.3 listening area and replace it with music and broadcasting that is not suitable for young families with children.

Thank you for your time and considerations.
